EXPERIENCE

Cohort Lab | Full Stack Web Developer

Noida, India | July 2025 - Sept 2025

At Cohort Lab, I worked as a Full Stack Engineer, contributing to two complete projects with responsibilities spanning both frontend and backend development. My role involved building responsive and user-friendly interfaces, integrating and consuming APIs, and ensuring smooth functionality across the applications. I collaborated closely with the team to develop, test, and optimize features, delivering reliable performance and a seamless end-to-end user experience.

MSKARD | Flutter Developer

Noida, India | October 2025 - Present

At MSKard, I worked as a Flutter Developer, where I was responsible for developing and maintaining cross-platform mobile applications using Flutter. My role involved translating UI/UX designs into high-quality, responsive screens, implementing application logic, and integrating APIs to ensure smooth data handling and performance. I focused on writing clean, scalable code, optimizing app performance, and fixing bugs to enhance overall user experience.

SKILLS

Programming Languages:	JavaScript, Swift, Python, C, Java, Dart
Libraries/Frameworks:	React, Node, Next.js, React Native, Flutter
Tools / Platforms:	API, Git, Xcode, VS Code
